

## Amphetamine

was expected in **1** sample and detected in **0**.

Instead, this sample contained **methamphetamine**.

## Ketamine

was expected in **16** samples and detected in **15**.

Purities ranged from **13 - 84%**.

**1** sample also contained **cocaine** & **1** sample also contained **MDMA**.

In the sample where **ketamine** was expected/wasn't found, **cocaine** was detected.

**2-FDCK** expected & detected in **1** sample

**5-MeO DMT** expected & detected in **1** sample

**βk-2C-B** expected and detected in **1** sample

**DMXE** expected & detected in **1** sample

**DMT** expected & detected in **1** sample

**Oxandrolone** expected & detected in **1** sample

## Heroin

was expected in **13** samples and detected in **12**.

Purities ranged from **54 - 77%**.

**3** samples also contained **6-MAM** & **acetylcodeine**.

## LSD

was expected in **4** samples and detected in **1**.

## Cocaine

was expected in **26** samples and detected in **23**.

Purities ranged from **<5 - 80%**

**1** sample also contained **creatine**, **1** sample also contained **caffeine** and

**1** sample also contained **lidocaine**.

**Acetylsalicylic acid** was detected in **1** sample where **cocaine** was expected but it wasn't found.

## MDA

was expected in **1** sample & detected in **0**.

**MDMA** was found instead.

## MDMA

was expected in **31** samples, detected in **29**.

Samples tested & their purity ranges:

**10/10** capsules contained **57 - 79%**

**3/4** pills contained **15 - 25%**

**2/2** powders contained **13 - 71%**

**14/15** crystalline contained **53 - 80%**

**1 MDMA** sample also contained **methamphetamine**.

Where **MDMA** was expected/wasn't found: **1** sample contained **chloromethcathinone**.

## Meth

was expected and detected in **8** samples.

Purities ranged from **51 - 80%**

**21 December 2024** to  
**20 January 2025**

## Community News

CanTEST have tested a total of **4057** samples to 20th Jan 2025.

We provided **192** health and AOD brief interventions and **9/133** samples were voluntarily discarded by people after they received their results.

We're aware of the increasing prevalence of both **novel benzodiazepines** and **nitazenes**, in a range of forms, including counterfeit pharmaceuticals.

On 7 February, NSW Health issued a public drug warning regarding a white tablet containing **protonitazene** which caused a severe opioid overdose in Sydney.

On **24 January** a counterfeit **XANAX/alprazolam** pill was presented to CanTEST, and we released a yellow community notice, as a combination of **alprazolam**, **bromazolam**, and **clobromazolam** were identified in the pill. View this and all other previous community notices at [www.cantest.com.au](http://www.cantest.com.au).
