

Ketamine

was expected in **36** samples and detected in **31**.

Purities ranged from **28 - 87%**.

1 sample also contained **MDMA (<5%)**.

Where **ketamine** was expected but not detected,

5 samples contained **MSG**.

Benzos

Alprazolam (or Xanax/Mylan*)

was expected in **6** samples and detected in **2**.

Where **alprazolam** wasn't detected,

1 sample contained **diazepam**,

1 sample contained

ethylflualprazolam, and

1 sample contained **bromazolam**, **clonazolam** and **diazepam**.

Diazepam (or Valium*)

was expected in **4** samples and detected in **2**.

Where **diazepam** wasn't detected,

1 sample contained

ethylflualprazolam.

*In some cases where service users provided an expected pharmaceutical brand name instead of an expected active drug.

GHB

GHB/GBL/1,4-BD was expected in **2** samples.

1 sample contained **1,4-butanediol (95%)**.

Oxycodone

was expected in **2** samples and detected in **1**.

Where oxycodone wasn't detected:

YELLOW
Community Notice
1 June

Caffeine,
chloroquine,
ketamine &
heroin detected

Heroin

was expected and detected in **8** samples.

Purities ranged from **6 - 80%**.

3 samples also contained **acetylcodeine**,

2 samples also contained **acetylcodeine** and **6-MAM**.

RED Community
Notice 8 May

2 samples also contained fentanyl, phenacetin, paracetamol and fluorofentanyl

Cocaine

was expected in **39** samples and detected in **37**.

Purities ranged from **10 - 89%**

1 sample also contained **lidocaine**,

1 sample also contained **procaine**.

Where **cocaine** was expected but not detected, **creatine** was found in **1** sample.

Steroids

were expected and detected in **4** samples.

1 sample contained **drostanolone enanthate**,
1 sample contained testosterone, and **2** samples contained **testosterone enanthate**.

While some steroid formulations can be analysed, not all steroids are suitable for our routine testing. Peptides present much greater analytical challenges and testing is very rarely possible.

Tapentadol

was expected and detected in **1** sample.

Others

In **6** unknown or undisclosed samples presented for testing, **1** contained **ketamine (35%)**, and **4** contained **methamphetamine (<5 - 80%)**.

208

samples tested from
**21 April to
20 May 2026**

CanTEST have tested a total of **6789** samples to 20th May 2026.

We provided **205** health and AOD brief interventions and **0/208** samples were voluntarily discarded by people after they received their results.

Please note that inactive fillers or substances of no analytical significance are not routinely reported in these monthly summaries. As a result, the number of findings presented here may be lower than the total number of expected samples.

MDMA

was expected in **80** samples, detected in **78**.

Samples tested & their purity ranges:

39/41 capsules contained **34-84%**

1/1 pill contained **28%**

2/2 powders contained **77-81%**

36/36 crystalline contained **36-84%**

Meth

was expected in **10** samples and detected in **9**.

Purities ranged from **64 - 80%**

2C-B

was expected and detected in **2** samples.

Purities ranged from **11 - 59%**.

1 sample also contained **MDMA (27%)**.

LSD

was expected and detected in **2** samples.
